

Ramiro Enzo Bogado León

Junior Backend Developer | Java · Spring Boot · React | AI Agents · MCP · RAG · SDD

ramiro99bogado@gmail.com | +54 11 3900-3592 | Buenos Aires, Argentina

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Junior backend developer with a Java/Spring Boot stack and hands-on experience building applied-AI architectures (MCP, RAG, SDD). Shipped full-stack projects to production, including a multi-user personal finance platform with a built-in AI assistant (FinanzasAppSDD), built end-to-end using spec-driven development. Anthropic-certified in building agents with the Claude API and the Model Context Protocol. Currently in the 4th year of a Systems Engineering degree (UNLa, GPA 8.20/10).

EDUCATION

Licenciatura en Sistemas (Systems Engineering)

2022 – Present

Universidad Nacional de Lanús (UNLa)

Intermediate degree earned: Analista Programador (Programmer Analyst). Currently in 4th year (70% completed) | GPA: 8.20/10.

Graduate Diploma in Software Development and AI Agent Architecture

June 2026 – September 2026

Universidad Nacional de Lanús (UNLa)

Model Context Protocol (MCP), RAG, AI-Ops, context engineering, vector databases (ChromaDB, Pinecone), SDD.

Technical Degree in Electronics

2012 – 2019

Escuela de Educación Secundaria Técnica (E.E.S.T.) N.º 5 "2 de Abril"

Technical training in the analysis, design, assembly, measurement, diagnosis, and repair of analog and digital electronic circuits. Background in electricity, electronics, instrumentation, microcontrollers, programming, automation, blueprint reading, and the use of measurement tools and equipment.

PROJECTS

FinanzasAppSDD

2026

Full-stack, multi-user personal finance management platform with a built-in AI assistant, built using spec-driven development with OpenSpec.

github.com/RamiroBogado/FinanzasAppSDD

ChatAnalyticsPlatform

2025

Web application that processes exported WhatsApp conversations and generates interactive analytics on participant activity, using a client-server architecture with a Spring Boot backend and a React/Next.js frontend.

github.com/RamiroBogado/ChatAnalyticsPlatform

AppFutbol

2024

Android app built with a team, combining a modern UI, local persistence, and REST API consumption. Covered Android architecture concepts, threading, and local database management.

github.com/RamiroBogado/AppFutbol

AppSpringBootTurnosG16

2023

Web app for appointment scheduling, built with Java and Spring Boot, with authentication and authorization via Spring Security, MySQL persistence through JPA/Hibernate, a Thymeleaf front end, validation, and email notifications.

github.com/RamiroBogado/AppSpringBootTurnosG16

CERTIFICATIONS

Building with the Claude API

2026

Claude Academy (Anthropic)

Building applications with the Claude API: authentication, multi-turn conversations, prompt engineering, and structured outputs. Tool use, agent integration, RAG pipelines, and the Model Context Protocol (MCP) — implementing both servers and clients.

academy.claude.com/verify/956e19f853c74100a46766a25f2df35c

SKILLS

Backend: Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs, JWT, Spring Security, Maven

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS

Databases: MySQL, SQL, MongoDB, data modeling, vector databases (ChromaDB, Pinecone)

Applied AI: Model Context Protocol (MCP), LangGraph, RAG, LLMs, context engineering, AI-Ops, Ollama

DevOps: Git, GitHub, Docker, Postman, CI/CD, Linux, Bash

Ways of working: Agile methodologies (Scrum/Kanban), SDD, TDD

EXPERIENCE

Municipal Operations Center (COM), Almirante Brown, Burzaco *January 2023 – Present*
Operator

- Cut critical-incident response time by 60% by monitoring 5 integrated video-surveillance and IT systems in real time, handling an average of 45 incidents per shift.
- Designed a digital logging system that ensured 100% traceability of operational events, documenting every incident for audits and post-event follow-up.
- Resolved up to 45 operational incidents per shift under pressure, applying urgency-based triage to speed up response.
- Coordinated communication across 3 types of agencies (security forces, emergency services, and interdisciplinary teams) via radio and digital platforms, driving the response to critical incidents.

Emergency Medical Care System (SAME), Almirante Brown *August 2020 – December 2022*
Radio Operator

- Coordinated the dispatch of medical resources across an average of 500 emergencies per month, operating communication systems under critical 5-minute response times.
- Triageed 15 emergency calls per shift, optimizing resource allocation by criticality level.
- Served as the communication link between the dispatch center and field medical teams, coordinating up to 10 simultaneous operations.

Self-Employed, Lomas de Zamora *2016 – Present*
IT and Gaming Console Repair Technician

- Diagnosed and repaired hardware and software faults on approx. 260 devices per year (PCs, laptops, PlayStation consoles), with an 80% resolution rate.
- Assembled and upgraded approx. 100 devices per year, configuring BIOS/UEFI and installing Windows and Linux operating systems.
- Set up approx. 50 local networks per year, tuning system settings to optimize performance.
- Managed end-to-end customer service for approx. 520 cases per year — intake, quoting, and repair follow-up.

LANGUAGES

English — B2+ (proficient in reading technical documentation)
