

RAMIRO ENZO BOGADO LEON

Backend Developer | Java · Spring Boot | AI Agents · MCP · RAG

Lomas de Zamora, Buenos Aires, Argentina | +54 11 3900-3592 | ramiro99bogado@gmail.com | linkedin.com/in/ramirobogado

PROFESSIONAL PROFILE

Backend Developer in training, specialized in Java and Spring Boot, with hands-on experience designing and implementing REST APIs, client-server architecture, and SQL/NoSQL database modeling. Currently in the 4th year of my Bachelor's in Information Systems (UNLA), complemented by a postgraduate diploma in Software Development and AI Agent Architecture, focused on Model Context Protocol (MCP), LangGraph, Retrieval-Augmented Generation (RAG), and AI-Ops.

I don't yet have formal work experience as a developer, but I back my learning with hands-on, end-to-end personal projects (public repositories listed below), and bring over 10 years of experience as an Electronics Technician and in computer/console repair, along with operational roles under pressure in monitoring and emergency response centers — experience that has sharpened my diagnostic ability, attention to quality, and comfort managing high-pressure situations.

Objective: to join as a Backend Developer Jr./Trainee on projects involving scalable solutions and the application of AI to software development.

PROFESSIONAL EXPERIENCE

Operator — Municipal Operations Center (COM), Almirante Brown *January 2023 – Present*

- Real-time monitoring of video surveillance systems and IT platforms for incident management.
- Logging and tracking of events, ensuring information traceability through digital tools.
- Resolution and prioritization of operational incidents under pressure, optimizing response times.
- Coordination with security forces, emergency services, and cross-functional teams via communication systems.

Radio Operator — Emergency Medical Care System (SAME), Almirante Brown *August 2020 – December 2022*

- Operation of dispatch and communication systems to coordinate resources during emergencies.
- Classification and prioritization of requests by criticality level, optimizing response times.
- Continuous communication with medical teams and emergency organizations to coordinate operations.

Computer & Console Repair Technician — Self-employed *2016 – Present*

- Diagnosis, maintenance, and repair of desktop computers, laptops, and PlayStation consoles.
- Assembly and upgrading of equipment: hardware installation, BIOS/UEFI configuration, and Windows/Linux OS setup.
- Local network configuration, software installation, and performance optimization.
- Customer service, quoting, and repair follow-up.

FEATURED PROJECTS

ChatAnalyticsPlatform — WhatsApp Conversation Analytics Platform

Technologies: Java · Spring Boot · React · Next.js · TypeScript · Chart.js · MySQL · Maven · Git · GitHub

Web application for processing exported WhatsApp conversations and generating interactive statistics on participant activity, built with a client-server architecture: Spring Boot backend and React/Next.js frontend for metrics visualization.

Repository: github.com/RamiroBogado/ChatAnalyticsPlatform

Appointment Management System

Technologies: Java · Spring Boot · Spring Data JPA · Hibernate · MySQL · Maven · Git · Thymeleaf

Web application for appointment management, handling users, specialties, and assignments through a layered architecture built on Spring Boot.

Repository: github.com/RamiroBogado/AppSpringBootTurnosG16

Digital Video Game Distribution Platform

Technologies: React · Vite · JavaScript · HTML5 · CSS3 · Bootstrap · Git · GitHub

Steam-inspired web application simulating a digital game distribution platform: browsable catalog, detailed game info, simulated purchases, and a user library, all in a modern, responsive interface.

Repository: github.com/RamiroBogado/DemoSteam-UNLA-PS20261C-E05

EDUCATION

Bachelor's in Information Systems — Universidad Nacional de Lanús 2022 – Present (4th year in progress)
GPA: 8.20/10 | Program completion: 70%

Electronics Technician — E.E.S.T. No. 5 “2 de Abril”, Temperley 2012 – 2019

COURSES AND CERTIFICATIONS

Postgraduate Diploma in Software Development and AI Agent Architecture — Universidad Nacional de Lanús

- AI agent architecture and Model Context Protocol (MCP).
- LangGraph and Retrieval-Augmented Generation (RAG).
- AI-Ops applied to software development and Context Engineering.
- Model evaluation with LangSmith and Braintrust.
- Vector databases: ChromaDB and Pinecone.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Hibernate / JPA, Node.js, Express.js, REST APIs, Maven.

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS.

Databases: MySQL, SQL, MongoDB, database modeling.

Applied AI: Model Context Protocol (MCP), LangGraph, RAG, AI-Ops, Context Engineering, Ollama, OpenCode, ChromaDB and Pinecone (in progress).

Tools & DevOps: Git, GitHub, Docker, Postman, Spring Tool Suite, Visual Studio Code.

SOFT SKILLS

Problem-solving and analytical thinking · Teamwork and effective communication · Continuous learning and adaptability to new technologies · Organization and priority management · Decision-making under pressure · Autonomy and results orientation · Professional responsibility and commitment.

LANGUAGES

Spanish: Native. | English: B2+ (technical documentation reading and written comprehension).

ADDITIONAL INFORMATION

- Available for remote, hybrid, or on-site work.
- Valid driver's license.
- Experience assembling, upgrading, and maintaining computers and laptops.
- Knowledge of hardware diagnostics, BIOS/UEFI configuration, and Windows/Linux OS installation.
- Basic knowledge of LAN/Wi-Fi networking and technical troubleshooting.
